To Work the Convicts.

Columbus.-The Ohio board of administration, as soon as possible, will put 150 of the convicts now in the idle house at the penitentiary at work in the state stone quarry.

The board will put an end to what is left of the old contract labor system as soon as a decision is reached as to what kind of work on state account may be undertaken and buildings can be equipped for manufacture.

Haste Not Wise.

"This board,' said President Allen W. Thurman, "has taken only one view of the contract labor system still in nicipal corporation to act as treasurer force at the penitentiary, and that is of school funds if he deems the comthat it is illegal. It is not for the new pensation fixed by the authorities to board of administration to criticise the board of managers for failure to abolish the system. Our business is to carry out the law and we're going to do it.

"We could order the prison contractors out of the penitentiary shops tomorrow, but would that be wise? Before we drive them out we must make provision to furnish work for 569 convicts now employed on prison contracts, otherwise they would have to go to the idle house, where more than 200 men are already sitting."

Lancaster.—Arthur Feigley, aged 23, a young business man, shot himself through the head and was found by his father later in the barn. He leaves a wife and three children. Despondency was the cause. He was the son of Zack Feigley, a prominent business

THING THAT PUZZLED BILLY

Was Sure Elevator Moved, but Progress Was Not Apparent to His Eyes.

Billy was a quaint old darkey who had come to the city for the first time. One day his employer sent him with a note to a man whose office was on an upper floor of a skyscraper, where every floor of the building was arranged and finished like the first one. Billy was directed by the elevator boy to enter the "lift," and he would then show him to the office he wanted. It was Billy's first experience in an elevator, and he did not rightly understand the nature or purpose of it. On his return he described some of his experiences to his employer.

"When I got ter de buildin' I axes er valler boy wut wuz er standin' in de inside ob de front doah whar Mr Brown's office wuz, an' he tol' me ter come wid him, an' he would show me. HANDS WOULD CRACK OPEN

"About two months ago my hands started to crack open and bleed, the skin would scale off, and the good flesh would burn and itch dreadfully. When my hands first started to get sore, there were small blisters like water blisters which formed. They itched dreadfully, it just seemed as though I could tear the skin all off. I would scratch them and the skin would peel off, and the fiesh would be all red and crack open and bleed. It worried me very much, as I had never had anything the matter with my skin. I was so afraid I would have to give up my employment.

"My doctor said he didn't think it would amount to anything. But it kept getting worse. One day I saw a piece in one of the papers about a lady who had the same trouble with her hands. She had used Cuticura Soap and Ointment and was cured. I decided to try them, and my hands were all healed before I had used one cake of Cuticura Ointment. I am truly thankful for the good results from the Cuticura Soap and Ointment, for thanks to them I was cured, and did not have to lose a day from work. I have had no return of the skin trouble." (Signed) Mrs. Mary E. Breig, 2522 Brown Street, Philadelphia, Pa., Jan. 12, 1911.

Although Cuticura Soap and Ointment are sold everywhere, a sample of each, with 32-page book, will be mailed free on application to "Cuti-cura," Dept. 6 K, Boston.
